**NOSE | TOPICAL | GUMS | TONGUE | REGARDLESS OF THE CAUSE**  
*"Excellent For Bleeding Resulting from Taking Blood Thinners"*

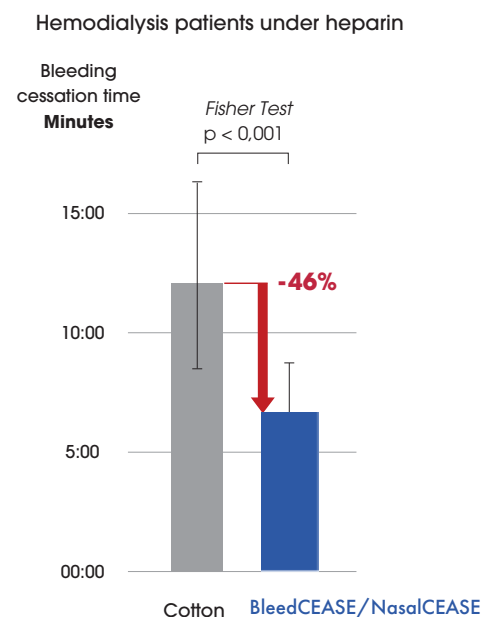

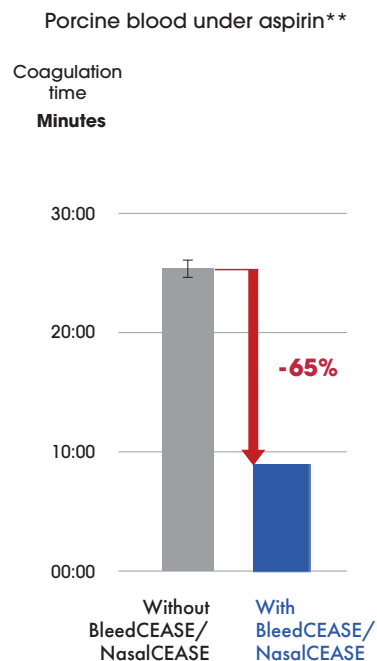

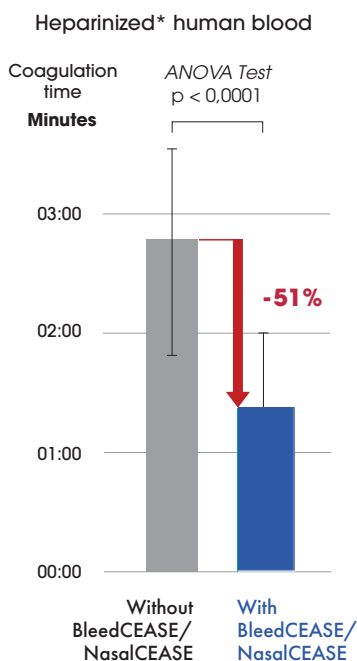

**BleedCEASE® The Quick and Easy Way to Treat Your Patients**  
*"Unique Product Quality and Best Value"*

### HEMOSTATIC EFFICACY EFICACIA HEMOSTATICA

#### In Vitro Studies

#### Clinical study

\*Report Q20190724NF2.2 from ctiBIOTECH, 2020; \*\* Report No. 4030 from BIOMATECH, 2001.

Clinical study: Dr. DAVID, Hôpital de Bavière, Liège - RD043, 1982.

Primary criterion: Bleeding cessation time at the puncture sites of arteriovenous fistulas, measured after needle removal.

Methodology: 8 hemodialysis patients (heparin injection at the beginning and during each session).

Cotton and NasalCEASE/BleedCEASE applied upon needle removal, each on a puncture site of the same patient during 3 to 6 sessions (64 measurements in total).

## Benefits:

- Releases calcium when in contact with blood - calcium is a clotting factor that stops bleeding fast
  - Absorbs up to 20 times its weight
- Doesn't disturb wound or clot when removing - no tearing clots or rebleeds
- Natural based - no side effects/no contraindications

### **BleedCEASE® and NasalCEASE®** **Work Well For Both Nosebleeds and Topical Bleeding!**

Key Causes Of Bleeding	Nosebleeds	Topical Bleeding
Taking Blood Thinners	X	X
Taking Nasal Allergy Sprays	X	
Diabetics		X
Hemophilia - Von Willebrands	X	X
Hereditary Hemorrhagic Telangiectasia (HHT)	X	
Pregnancy	X	
Dry Climate - High Altitude	X	
Aging - Thinning Skin / Mucosa	X	X
Sports Related Trauma	X	X
Shaving		X
Injuries Around Home - Work		X
Nasal Allergies, Colds And Infections	X	
Cancer Therapies	X	
Spontaneous Nosebleeds In Children	X	
Dialysis stubborn bleeding following ending session		X
